Originally a Belgian supplied car that has been in the hands of its last owner for 16 years. Delivered new with a catalytic convertor, this is one of the few F40s left in existence with all the original factory markings such as the codes on the suspension arms plus the visible Kevlar weave on parts of the bodywork. The car has recently been serviced with new fuel cells installed by Graypaul Ferrari. It comes complete with its original books, wallet, tool kit, car cover and tyre canister, one of the very best examples of this iconic supercar!
