TOM HARTLEY JNR

2014 PAGANI Huayra

Midnight Blue with Black

SOLD

Mileage	25 miles	Engine Capacity	5980cc
Body Style	Coupe	Fuel	Petrol
Transmission	Automatic	Chassis No.	76024

The Huayra is the very best interpretation of combining art with engineering, from its beautiful sculptured body made of more than 4000 components (engine and gearbox not included) to its wonderful 5980cc Mercedes-AMG engine that produces 1000nm of torque. 1 of only 100 examples to be produced of which only 19 are right-hand drive and only 2 reside in the UK, with the majority located in Asia and North America. Optional extras include: front lifting system, multi-layered custom paint, exterior aluminium set in titanium finish, Huayra style wheels finished in Liquid Silver, black brake callipers, malefic premium leather, interior aluminium set in titanium finish plus full stone chip protection. A supercar with real heart and soul, something that can be aesthetically appreciated from every angle whilst very much at home on the open roads with its breathtaking performance.
