Rosso Scuderia with Tessuto Nero-Rosso

£SOLD

Mileage	37,507 miles	Engine Capacity	3586cc
Body Style	Coupe	Fuel	Petrol
Transmission	Semi-automatic	Chassis No.	132916

The 360 Challenge Stradale is a track focused road car that was conceived by Ferrari and derived from their success in the FIA GT race series and Ferrari Challenge International Championships.

Only 1,288 examples were ever produced worldwide.

The concept was to produce a road legal motorcar with track performance capabilities by concentrating on handling, braking and weight reduction, which are essential in pure racing cars. Major upgrades from the standard 360 included carbon ceramic brakes, track-tuned suspension, weight reduction and power improvement via revised gearbox software.

Ferrari engineers designed the Challenge Stradale from the outset with the goal of it being used for both road and track, 20% track day use and 80% road use, hence the denomination 'Challenge Stradale' (Challenge Street).
