Since coming into our ownership in early 2013, we made the decision to carry out a more comprehensive restoration than previously completed roughly 20 years ago. The car has been totally stripped of all components, the mechanical side entrusted to marque specialist Bob Houghton, who recently won the Lamborghini Club Concours with a Miura he completed in 2012. The bodywork including gaps, profiles and paintwork has been completed by renowned specialists XK Engineering and the interior is currently being completed by Interni Auto Snc in Ferrara, Italy.
