Frost Blue with Semi Aniline Blue Leather

£SOLD

Mileage	3 miles	Engine Capacity	3994cc
Body Style	Coupe	Fuel	Hybrid
Transmission	Semi-automatic	Chassis No.	403046

Car number 46 of only 106 examples ever produced, all of which were hand-assembled by McLaren Automotive at their world-leading Technology Centre, which is shared with its Formula 1 racing team.

McLarenâ€™s first Hyper-GT, the Speedtail, is its most powerful road car to date and also its most aerodynamically efficient production car. The car set a benchmark for innovation, design, and space, with its central driving position first pioneered by the company's legendary F1. It offered the driver an unmatched panoramic view of the road and interior space, further enhanced by the amount of glass and flawless dashboard design. The exterior design was unique in the automotive production car world, with every element crafted to create the most aerodynamic shape possible. The carâ€™s air is routed seamlessly over, under, and around the body, from the front of the car to the innovative rear trailing edge ailerons. Designed for unparalleled performance, the Speedtail features a self-charging petrol-electric hybrid powertrain producing 1,070 PS (1,036 hp), resulting in an astonishing 0-300 km/h (186 mph) in just 13 seconds, and a top speed of 403 km/h (250 mph).
