The Lancia Aurelia B20 GT is regarded as the birth and realisation of the 'Gran Truism' concept. Very advanced for its time, quick, smooth and effortless to drive and the first production car to employ a V6, rear-wheel drive, unitary construction. The car we have on offer here is presented in its original colours, came from a highly respected collector and has recently been prepared for sale by marque specialists Omicron Engineering Ltd. Eligible for just about every vintage event and what a fantastic car to do the Mille Miglia in!
