1 of only 10 examples built by AC Cars to correct period specification, known as the 'continuation cars', fitted with a genuine 7.0 litre/427ci high compression â€˜top oilerâ€™ (as opposed to a â€˜side oilerâ€™) engine and the enlarged endurance racing fuel tank, only 3,385miles from new, total original paint and perfectly sorted throughout, originally destined for America, this car also benefits from having a â€˜CSXâ€™ chassis number prefix. Outstanding performance, a correct continuation car built by the factory thatâ€™s a fraction of the cost of an identical period example.
