

1886 Benz Patent-Motorwagen £50,000

Mileage	N/A miles	Engine Capacity	cc
Body Style	N/A	Fuel	N/A
Transmission	N/A	Chassis No.	

A beautifully crafted tribute to Karl Benz's Patent-Motorwagen, which is regarded as the first practical self-propelled vehicle.

Built by John Bentley Engineering to such an exact detail that Mercedes-Benz ordered over 100 examples which were subsequently distributed and displayed in selected Mercedes-Benz dealers around the world.

Powered by a petroleum-fuelled four-stroke internal combustion engine, which is incredibly fun to use and also a great piece of rolling art for any automotive environment.

Price excludes VAT but can be supplied tax free as an export sale.
