TOM HARTLEY JNR

2021 FORD GT Carbon Series

Liquid Grey with Black Leather

£SOLD

Mileage	18 miles	Engine Capacity	3496cc
Body Style	Coupe	Fuel	Petrol
Transmission	Semi-automatic	Chassis No.	200179

The 2021 Ford GT is a 2nd-generation model, its production was limited to only 1,350 examples ever produced worldwide.

Honouring the Ford GT legacy, GTs stand out for rich racing legacy, high-performance capabilities, and advanced technology. As a contemporary homage to the iconic Ford GT40 – renowned for its 1960s triumphs at the 24 Hours of Le Mans, the Ford GT carries forward this storied tradition. It emphasises speed, precision handling, and aerodynamic excellence, embodying the spirit of its legendary predecessor.

The second-generation Ford GT represents a major advancement over its predecessor, delivering a more sophisticated, capable, and track-oriented driving experience. Its carbon fibre monocoque chassis and extensive carbon fibre body panels reduce its weight by over 110 kg while increasing rigidity compared to the first generationâ€™s aluminium structure. The car features a track-tuned suspension with pushrod-actuated dampers inspired by Le Mans race technology, offering sharper

handling and enhanced road feedback. Equipped with a 7-speed dual-clutch automatic transmission, it provides faster, smoother gear shifts for improved performance on both road and track. Powered by a 3.5 litre twin-turbocharged EcoBoost V6 producing 660 horsepower and 550 lb-ft of torque, it accelerates from 0 to 60 mph in just 3.0 seconds and is capable to reach a top speed of 216 mph. Combined, these engineering upgrades make the second-generation Ford GT a significant leap forward in performance and driving dynamics compared to the first generation.

This particular example is a highly coveted variant called the exclusive 'Carbon Series'. With only 50 units produced globally and just five reportedly delivered to the UK, it presents a truly rare opportunity to own one.

It is a UK supplied, delivery mileage Carbon Series example that benefits from a very high specification that includes the Dark Energy upgrade package that consists of: 20″gloss exposed carbon fibre wheels, exposed carbon fibre to door sills, carbon fibre centre console, carbon fibre air register pods, silver anodised shift paddles. Leather steering wheel, 6-point harness anchors, exposed carbon fibre exterior mirror caps, carbon series exterior blue accents package, non-standard liquid paint finish, blue brake callipers, titanium wheel nuts and full PPF.

Presented in 'as new' condition throughout and complete with its original service/warranty supplement, Ford GT manual, Ford GT presentation folder that includes: production images, general information specification sheet and Monroney export label. Spare key, tool kit, car cover, OEM trickle charger, locking wheel nuts and a dedicated history file.
