£SOLD

Mileage	52 miles	Engine Capacity	3799cc
Body Style	Convertible	Fuel	Petrol
Transmission	Semi-automatic	Chassis No.	009195

The McLaren 600LT Spider is the track-focused but road-legal pure drivers car joining the 'Longtail' model range from the Sports Series. A limited production series of just 340 examples produced worldwide. IntroducedÂ as the spiritual successor to the F1 GTR Longtail and its elder brother the 675LT.

Its superb performance is achieved from the cars upgraded and re-engineered V8 twin-turbo now producing some 600PS (592bhp). Upgraded race proven flat-plane crankshaft enables the V8 to be mountedÂ lower so to improve agility and handling. Dry sump system permits higher cornering speeds without engine oil surge. Additionally, further weight gains of some 100kg were achieved with the use of lightweight carbon fibre body struture. Aerodynamically assisted with a longer and lowered body, front carbon splitter, carbon fibre fixed rear wing, longer diffuser and the legendry Senna inspired top exit titanium exhaust pipes. The cars outstanding exhilarating performance produces a 0-100km in just 2.9 seconds and a 200km in just 8.4 seconds and a top speed of 324km.
