| Transmission | PDK | Chassis No. | 234249 |

The Porsche 718 Spyder RS represents the ultimate open-top expression of Porscheâ€™s GT division, combining the raw intensity of the GT4 RS with the unmistakable theatre of roof-down driving. Developed with direct influence from Porsche Motorsport, the Spyder RS is powered by the celebrated 4.0-litre naturally aspirated flat-six engine derived from the 911 GT3, producing 493bhp and revving to a remarkable 9,000rpm. Delivering an intoxicating soundtrack and razor-sharp response, the Spyder RS accelerates from 0â€“62mph in just 3.4 seconds and on to a top speed of 191mph.

Lightweight, uncompromising and engineered with driver engagement at its core, the Spyder RS features an aggressive aerodynamic design, extensive use of carbon fibre and a bespoke lightweight roof system designed to maximise performance whilst preserving the purity of the driving experience. Combined with its signature side air intakes positioned directly behind the occupants, the Spyder RS delivers one of the most visceral and immersive driving experiences of any modern Porsche, perfectly blending motorsport engineering with open-air exhilaration.
